

Nov. 4, 2009 (#444)

# Alan Watt "Cutting Through The Matrix" LIVE on RBN:

Poem Copyright Alan Watt Nov. 4, 2009:

## With Copenhagen Treaty it's Over -- Lucky to Eat Clover:

"Copenhagen Treaty Coming, All Hot Air and Boor,  
Redistributing Wealth from 'Rich' to the Poor,  
World Socialists All, Plank of Communist Manifesto,  
When it's Signed, We're in the Poorhouse, Hey Presto!  
Well-laid Plans of Those Who Meet, in Secrecy Plan Deceit,  
For Communism was a Lie from the Start  
Funded by Rich Men, Black Their Heart,  
Who Follow a Religion Unknown to Most,  
They are the Gods, Their Body the Host,  
Using Front Groups, Dialectics Down through the Ages,  
Fomenting War, Revolution Led by Oratorical Sages,  
They will Foment the Riots, Guide the Insurrect  
En Route to Perfecting That Left Imperfect"

Hi folks. I am Alan Watt and this is Cutting Through The Matrix on November 4<sup>th</sup>

2009. Newcomers should look into [cuttingthroughthematrix.com](http://cuttingthroughthematrix.com) web site. You'll find hundreds of hours of talks I've given in the past for download, in audio form. You'll also see on the front page if you scroll down, all the other sites I have up there. Once in a while the big ones go down. If you bookmark these, you can always find the latest shows and download them [listed above]. [alanwattsentientsentinel.eu](http://alanwattsentientsentinel.eu) is the European site and it has all the audios but it has the addition of a lot of transcripts of the talks I've given. You can download them and they are in the various languages of Europe.

Remember, YOU are the listeners who bring me to you. I'm not backed by any foundation, any NGO group. I'm not a member of any political party. I'm not pushing myself for a career here. I'm not pushing products by sponsors. The ads on this show are paid by the advertisers straight to RBN for air time and for the staff, the equipment and their bills and all the stuff that we pay ourselves at home too. It's much more expensive when you're broadcasting on radio of course. It's up to you to keep me going. You can do so if you go into the web sites, see what I have for sale there. You'll also find you can donate to me as well. You can order my books and disks through PayPal as well as donate [options listed above]. Some people just send cash to cut out the guy with the little podgy fingers and the triple chins. It's up to you to keep me going. I really need help. Money just trickles in here. It trickles in from the SAME people and sometimes they can't manage themselves either. So it's up to you to keep me going or I won't be on the air one day. It's a simple as that. I'm going backwards not forwards. Believe you me, it's more than a 7 day a week, full-time occupation just doing this stuff and everything else I have to do at home. For those who get the disks burned and passed to them, you can get in touch with me at [address above] and that will get to me. Remember too, I'll stress it again. If you want to donate or buy books or CDs - some of the CDs I have, have 50 shows on them. It's a good deal. You can use PayPal... just email me separately from your payments.

I'm not kidding. I am going backwards... really backwards this time of year. I know it's tough out there for people as well. I don't ask for the usual kinds of... I don't actually put anything up on my web site that you have to PAY to get into. It's one of the few places that you don't have to go into my archives and pay for them; it's free. But eventually, I'm going to just go off or do something drastically different. Or bring on the advertisers who will sit and scare the hell out of you for half an hour and then flog their products, the savior at the end. That's how it's done. And I'd get \$5,000 a cut for that. How is that? It's up to you. I'll be back with more after this break.

Hi folks. I am Alan Watt and we're Cutting Through The Matrix. I mentioned once again The Club of Rome the other night, the PREMIER think-tank - they call themselves - for the United Nations. The guys who boasted in their book, **The First Global Revolution**, that they were given the task to unite the world into the new system. They had to have a common enemy to make it so because we all come together and sacrifice during a war type scenario. So they said basically that man would be the enemy and that global warming, the threats of famine and "the like," water shortages and "the like" would "fit the bill." That became the mantra from then on.

We also know that Maurice Strong and his Earth Charter in 1992, as he fronted for the big corporations, the United Nations and the foundations - Mr. Rockefeller is

his best pal of course, his mentor, also behind him - came out with the Earth Charter and got all the countries to sign on to that. STEP BY STEP INCREMENTALISM as they pulled out their master plan. They were going to use environmentalism and global catastrophes as the reason to bind us all together under a new collective system.

[Alan reading from: **Quotes from "The Green Agenda" (green-agenda.com)** ]

*(A: They wrote another book after that called **Mankind at the Turning Point**, from the Club of Rome. This is what they said...)*

*"In nature, organic growth proceeds all according to a master plan, a blueprint. Such a master plan is missing from the process of growth and development of the world system. Now is the time to drop a master plan for sustainable growth and world development based on global allocation of all resources (based on global allocation of all resources) and a new global economic system." - Club of Rome, Mankind at the Turning Point*

*(A: That's for the hard of thinking... I'm repeating that part again. "A new global economic system." What do you think that means? It's not just a new currency. It's a new WAY OF LIVING... totally. Will you work for yourself or will you work for the world state? It goes on to say...)*

*"Ten or twenty years from today, it will probably be too late."*

*(A: Because we'd catch on to them, that's why. That's from **Mankind at the Turning Point**, Club of Rome.)*

~~~~~  
*(A: They trot out the ex-KGB and ex-President of the Soviet Union, when it was still the Soviet Union. The man that was brought out TO MERGE the Soviet with the West, as we found out from The Reece Commission that was going to happen... done in the 1950s. Mikhail Gorbachev, founder of Green Cross International. He said...)*

*"We need a new paradigm for development in which the environment will be a priority. World civilization as we know it will soon end. We have very little time and we must act. If we can address the environmental problem, it will have to be done in a new system (a new system) a new paradigm. We have to change our mindset, the way humankind views the world."*  
- Mikhail Gorbachev, founder of Green Cross International

*(A: In other words, they're going to change OUR mindset, you see.)*

~~~~~  
*(A: Then, from the United Nations Commission on Global Governance Report. Global Governance Report, the UN... this unelected body, this PRIVATE Corporation set up by those who own the foundations like Rockefeller. In fact, Rockefeller donated the land they build it on. It used to be the biggest kosher slaughterhouse in New York. Well sacrificed for its purpose.)*

*"The concept of national sovereignty has been immutable, indeed a sacred principle of international relations. It is a principle which will yield only*

slowly and reluctantly to the new imperatives of global, environmental cooperation.”

- UN Commission on Global Governance report

(A: *See, it's your sovereignty that is to go. I hope you realize that it's nothing about CO2. This is all the big nonsense, the gas that was put out by The Club of Rome when they were given the task to find something they could PUSH on the public to BELIEVE as to the reasons why we all had to give up sovereignty and come together. Then THEY would allocate resources TO you. That means dishing out the food to each bloc or region, as they call it, to bring down your population. So that's what they said.)*

“The concept of national sovereignty has been immutable, indeed a sacred principle of international relations. It is a principle which will yield only slowly and reluctantly to the new imperatives of global, environmental cooperation.”

- UN Commission on Global Governance report

~~~~~  
(A: **The First Global Revolution**, the first book I mentioned from The Club of Rome, written by the founders, the ones who dreamed up the idea. They said in the same book that they looked at all kinds of government and governance and they decided that COLLECTIVISM - out of all the types that they had at that time, the Soviet system, democracy and all the rest of it - COLLECTIVISM, which is the Soviet system, was BEST SUITED for their needs, for the world. Here's what they say too...)

“Democracy is not a panacea. It can not organize everything and it is unaware of its own limits. These facts must be fairly faces squarely, sacrilegious as this may sound, democracy is no longer well suited for the tasks ahead. The complexity and the technical nature of many of today's problems do not always allow elected representatives to make competent decisions at the right time.”

- Club of Rome, The First Global Revolution

(A: *Remember what the Huxley's and all these guys said? They're bringing in a world of a scientific elite to RULE the peoples in a collectivist fashion. Democracy is just a panacea. We believe in it. It truly is... it's actually a placebo, you might say. It looks like the real thing but it isn't. We never had REAL democracy and these boys have decided long ago that we should not have it and we should never have it. We're not CAPABLE of having it in fact, they believe. Only the better kind can judge and steer the ship of earth... not the masses, unwashed, silly masses.)*

(A: *It's all elitism at the top. I hope you realize that. I hope you really realize what it's ALL about. The depopulation agenda is such a MASSIVE PRIORITY with them because, as Charles Galton Darwin said in his book **The Next Million Years**, we got to get rid of all these people at the bottom or they'll outbreed the better types, like himself.)*

~~~~~  
(A: *Mikhail Gorbachev again, at The State of the World Forum...*)

“Emerging environmentalization of our civilization and the need for vigorous

action in the interest of the entire global community will inevitably have multiple political consequences. Perhaps the most important of them will be a gradual change in the status of the United Nations. Inevitably, it must assume some aspects of a world government."

- Mikhail Gorbachev, State of the World Forum

*(A: Well, that's what it was set up for. There was a book put out by a Toronto bureaucrat called... his last name was Scott-Reed. I think it was something about a diary of a Canadian diplomat at the United Nations. He drafted up, along with Alger Hiss and Lester B. Pearson, the constitution and the charter for the United Nations. They were ALL communists by the way.)*

~~~~~  
- Mikhail Gorbachev, co-author of The Earth Charter

*(A: Remember, this is a Soviet leader of the country... co-author of The Earth Charter for all of us, with an acceptance of all the so-called democratic counties. You think you've been democratic? NO. They never, ever intended for you to have democracy. It was a Punch and Judy show as they spent the last 100 years working towards this very end. It says...)*

"I envisage the principles of the Earth Charter to be a new form of the ten commandments.

They lay the foundation for a sustainable global earth community."

- Mikhail Gorbachev, co-author of The Earth Charter

*(A: That means drastic reduction on all the working classes. They don't need the working classes now. They don't NEED them. They've got them all in China. That's the working class now.)*

~~~~~  
"In my view, after fifty years of service in the United Nations system, I perceive the utmost urgency and absolute necessity for proper Earth government. *(A: That means global government.)* There is no shadow of a doubt that the present political and economic systems are no longer appropriate and will lead to the end of life evolution on this planet. *(A: That means the over-bred at the bottom, according to them, will outbreed them at the top.)* We must therefore absolutely and urgently look for new ways."

- Dr Robert Muller, UN Assistant Secretary General *(A: What a character he is... an old Nazi.)*

~~~~~  
"Nations are in effect ceding portions of their sovereignty to the international community and beginning to create a new system of international environmental governance as a means of solving otherwise unmanageable crises." *(A: And they're not talking about the environment.)*

- Lester Brown, WorldWatch Institute

~~~~~  
"Regionalism must precede globalism. *(A: See, we're all cut up into regions now.)* We foresee a seamless system of governance from local communities, individual states, regional unions and up through to the United Nations itself." *(A: That's to be the big boss.)*

- UN Commission on Global Governance

~~~~~  
"A keen and anxious awareness is evolving to suggest that fundamental

changes will have to take place in the world order and its power structures, in the distribution of wealth (A: *That's one of the planks of the Communist Manifesto, collectivism, that's how they call it there.*) and income. (A: *You've got to distribute your wealth and your income... BY FORCE by the way, by LAW... to supposedly third world countries. No choice in the matter, it will be by LAW. That's what all this carbon tax, apparently, supposedly is to go to. Any kind of gas tax would do wouldn't it?*) Perhaps only a new and enlightened humanism (A: *Humanism...*) can permit mankind to negotiate this transition."

- Club of Rome, Mankind at the Turning Point

~~~~~  
"The alternative to the existing world order can only emerge as a result of a new human dimension of progress. We envision a revolution of the mind, a new way of thinking."

- Mikhail Gorbachev, State of the World Forum

I'll be back with more of these quotes after this break.

Hi folks. This is Alan Watt and we're Cutting Through The Matrix and reading some quotes from the big boys, they guys that came up with the CONS that are meant to enslave us and change us all into a preplanned system, written long ago, and they decided to use the environment to bring it along. That's why they INVENTED the whole idea of global warming... and they did invent it, by the way.

(A: *Here's what Al Gore said... listen to the words...*)

"We require a central organizing principle - one agreed to voluntarily. Minor shifts in policy, moderate improvement in laws and regulations, rhetoric offered in lieu of genuine change (A: *In other words, they always give you promises things will get better.*)- these are all forms of appeasement, designed to satisfy the public's desire to believe that sacrifice, struggle and a wrenching transformation of society will not be necessary."

- Al Gore, Earth in the Balance

(A: *Most of society hasn't a clue what's going on. They get the PR stuff from the major media and they don't realize that they are being APPEASED... 'don't worry too much; it's not going to be that bad.'* So he says here,

"We require a central organizing principle - one agreed to voluntarily. Minor shifts in policy, moderate improvement in laws and regulations, rhetoric offered in lieu of genuine change - these are all forms of appeasement, designed to satisfy the public's desire to believe that sacrifice, struggle and a wrenching transformation of society will not be necessary."

(A: *That means you're GOING to have a wrenching transformation of society. That's going to be a big shock, isn't it? It's going to be done once they sign the last deal, which is already signed, by the way, just put their little thumbprints on it. It was done at the meeting at Barcelona, all drafted up there, and all the prostitutes will go over there and sign it into law at Copenhagen.*)

"Adopting a central organizing principle... means embarking on an all-out effort to use every policy and program, every law and institution... to halt the

destruction of the environment."

- Al Gore, Earth in the Balance

*(A: They dreamed up the whole idea... The Club of Rome... and the environment. That's going to be the mantra.)*

~~~~~  
"Effective execution of Agenda 21 will require a profound reorientation of all human society (A: *That means all of YOU. I know it's hard for people out there to believe it. It means YOU, yes, you.*), unlike anything the world has ever experienced, a major shift in the priorities of both governments and individuals and an unprecedented redeployment of human and financial resources. This shift will demand that a concern for the environmental consequences of every human action be integrated into individual and collective decision-making at every level."

- UN Agenda 21 (A: *From the United Nations.*)

*(A: Every level. You're going to be taxed into the ground. Then they'll bring out the new system where you won't get taxed, you'll get credits from the government, just enough to live on, no private property, school-to-work, all that stuff, scientists deciding what you do, agencies running your lives for you. That's the fact. That's the wrenching experience they're talking about here, the UPHEAVAL they're talking about... RADICAL.)*

~~~~~  
"The current course of development is thus clearly unsustainable. (A: *That means too many people for their liking.*) Current problems cannot be solved by piecemeal measures. More of the same is not enough. Radical change (A: *Radical means radical, if you understand what radical means.*) from the current trajectory is not an option, but an absolute necessity. Fundamental economic, social and cultural changes that address the root causes of poverty and environmental degradation are required and they are required now."

- from the Earth Charter website

*(A: The system that is coming in is an updated collectivist, socialist system.)*

~~~~~  
"The goal now is a socialist, redistributionist society, which is nature's proper steward and society's only hope."

- David Brower, founder of Friends of the Earth

*(A: Where they redistribute the wealth of you - you're all very rich out there apparently - but they're going to make sure that you'll be down to the same level as all those poor folk that will never get the money that's sent over to them. A plank of The Communist Manifesto and that's what it is folks. The goal is now a socialist, redistributionist society. Just as communist as Mr. Al Gore is... the multi-millionaire shortly to be multi-billionaire Al Gore. And you thought that communists were a poor working class people. They never, ever were, at the top, never, ever. They were the richest bar stewards on the earth.)*

~~~~~  
"If we don't overthrow capitalism, we don't have a chance of saving the world ecologically. I think it is possible to have an ecologically sound society under socialism. I don't think it is possible under capitalism"

- Judi Bari, principal organiser of Earth First!

*(A: One of the big UN organizations.)*

~~~~~  
"Isn't the only hope for the planet that the industrialized civilizations collapse?

Isn't it our responsibility to bring that about?"

- Maurice Strong, founder of the UN Environment Programme

*(A: He was also head of the World Bank at one point.)*

~~~~~  
"A massive campaign must be launched to de-develop the United States. De-development means bringing our economic system into line with the realities of ecology and the world resource situation."

- Paul Ehrlich, Professor of Population Studies

*(A: The guy who wrote a book along with the US science czar to depopulate the world. Back with more after these messages.)*

Hi folks. I am Alan Watt and we're Cutting Through The Matrix, reading quotes from some of the bigger players that ARE running your life. They are more important, in fact, than the politicians - the little clowns - they give us for Presidents and Prime Ministers. They just do what they are told.

~~~~~  
*(A: I told you the parallel government is made up of all these organizations and their NGOs and the foundations that fund them... all connected to the United Nations.)*

"The only hope for the world is to make sure there is not another United States. We can't let other countries have the same number of cars, the amount of industrialization, we have in the US. We have to stop these Third World countries right where they are."

- Michael Oppenheimer, Environmental Defense Fund

*(A: That's the real reason they're still poor in the third world countries. They don't intend to take all the money off you and give it to them, under the guise of helping them clean up their own air. IT'S NOT GOING TO GET TO THEM. That's the agenda. It's to kill a lot of them off... and us too by the way.)*

~~~~~  
*(A: This is one of the guys who helped... he was a founder of the Club of Rome.)*

"Global Sustainability (A: He's talking about people when he says this.) requires the deliberate quest of poverty (A: That means introduction and creation of poverty.), reduced resource consumption (A: That's to bring down your food levels and so on.) and set levels of mortality control." (A: Not just birth control... MORTALITY control. In other words, a stepping up of those who get euthanized at the other end. Do you understand that? You understand what I'm saying here?)

- Professor Maurice King

*(A: By God, when this treaty is signed and the UN comes to its full power -*

*it's designed to come up to total power and all of these laws and the Copenhagen Treaty go into effect in 2012 - you're going to get hammered for every penny you have and more. The deliberate quest of poverty... you'll be poor alright. This is the agenda.)*

~~~~~  
"We must make this an insecure and inhospitable place for capitalists and their projects. We must reclaim the roads and plowed land, halt dam construction, tear down existing dams, free shackled rivers and return to wilderness millions of acres of presently settled land."

- David Foreman, co-founder of Earth First!

*(A: He's talking about the US primarily and Europe.)*

~~~~~  
"Complex technology of any sort is an assault on human dignity. It would be little short of disastrous for us to discover a source of clean, cheap, abundant energy, because of what we might do with it."

- Amory Lovins, Rocky Mountain Institute

*(A: You're never going to get cheap, abundant free energy, folks. It was never in the cards.)*

~~~~~  
"The prospect of cheap fusion energy is the worst thing that could happen to the planet."

- Jeremy Rifkin, Greenhouse Crisis Foundation

*(A: He gets funded by all the big boys and Rockefeller too.)*

~~~~~  
"Giving society cheap, abundant energy would be the equivalent of giving an idiot child a machine gun."

- Prof Paul Ehrlich, Stanford University *(A: Co-writer of Eco-Science along with the science czar who is currently in the US Congress right beside Obama.)*

*(A: See, that's what we are. We are all idiot children to these elitists who want to kill us off. Ehrlich wants to sterilize most of you. In fact, they've been doing it because after all, we are just the idiot children aren't we. You can't tell idiot children what you're actually doing to them because even idiot children can get angry.)*

~~~~~  
"The big threat to the planet is people: there are too many, doing too well economically and burning too much oil."

- Sir James Lovelock, BBC Interview

~~~~~  
*(A: These guys get incredible salaries from the big foundations, the parallel government that really runs the world.)*

"My three main goals would be to reduce human population to about 100 million worldwide, destroy the industrial infrastructure and see wilderness, with its full complement of species, returning throughout the world."

-Dave Foreman, co-founder of Earth First!

*(A: That's so he and all the elite can have their offspring, you know... their*

perfect offspring and they'll just have a big, nice world to themselves. Mind you, they can't tie their own shoe laces - these guys - but they'll have cloned super-breeds to do that for them. They probably won't even need sleep.)

~~~~~  
(A: Maurice Strong. This guy has done more in his lifetime to bring up the United Nations. He's all over the world. He comes from a family of revolutionaries. His Aunt or his cousin is over buried next to Mao Tse-Tung, close friend and advisor of him in fact... it says on the tombstone. It never stops. He was picked up by Rockefeller and groomed. He never even finished high school, he didn't have to, and thrown into the big oil companies to make a few million dollars and then put into the United Nations. He helped set up the whole GATT Treaty for trading with China and giving them all our factories and having it transported over there and set up.)

"Current lifestyles and consumption patterns of the affluent middle class - involving high meat intake, use of fossil fuels, appliances, air-conditioning, and suburban housing - are not sustainable."  
- Maurice Strong, Rio Earth Summit

(A: And so says that God. You see, he believes he's a God, that one.)  
~~~~~  
"Mankind is the most dangerous, destructive, selfish and unethical animal on the earth."  
- Michael Fox, vice-president of The Humane Society

(A: Well, he should know... with a name like that.)  
~~~~~  
"Human beings, as a species, have no more value than slugs."  
- John Davis, editor of Earth First! Journal

(A: ... "Human beings, as a species, have no more value than slugs." You understand what we're dealing with here. This is going to be life or death shortly. They're not kidding at the top.)  
~~~~~  
"Humans on the Earth behave in some ways like a pathogenic micro-organism, or like the cells of a tumor."  
- Sir James Lovelock, Healing Gaia

(A: What was it David Suzuki said, the other great environmentalist for Canada and the United Nations? ...who likes furry animals? The geneticist actually. I think he referred to people as being maggots... maggots. Even within the maggot community, he says, some rise to the top, the superior type, and the rest stay at the bottom. I guess he's one of the maggots at the top.)  
~~~~~  
"The Earth has cancer and the cancer is Man."  
- Club of Rome, Mankind at the Turning Point

~~~~~  
(A: Again, the wonderful Paul Ehrlich, who wanted to sterilize everybody mandatorily, through government laws and great pal of the science czar of Mr. Obama who wrote the book EcoScience - it's all in it.

"A cancer is an uncontrolled multiplication of cells; the population explosion is an uncontrolled multiplication of people. We must shift our efforts from the treatment of the symptoms to the cutting out of the cancer. The operation will demand many apparently brutal and heartless decisions."

- Prof Paul Ehrlich, The Population Bomb

*(A: But these psychopaths at the top will have no problems with that. They've got it all drafted up and ready to go down.)*

*(A: Prince Phillip, that red-nosed boozier that hasn't worked a day in his life...)*

"I don't claim to have any special interest in natural history, but as a boy I was made aware of the annual fluctuations in the number of game animals and the need to adjust

the cull to the size of the surplus population."

- Prince Philip, preface of Down to Earth

*(A: I don't think people really understand what we're dealing with. I wonder if they do.)*

"A reasonable estimate for an industrialized world society at the present North American material standard of living would be 1 billion. *(A: He's talking about for the whole world living at that standard.)* At the more frugal European standard of living, 2 to 3 billion would be possible." *(A: He's talking about for the whole world.)*

- United Nations, Global Biodiversity Assessment

"A total population of 250-300 million people, a 95% decline from present levels, would be ideal."

- Ted Turner, founder of CNN and major UN donor

*(A: All your big corporations are owned by these boys, folks... that you get your media from and your newspapers.)*

"... the resultant ideal sustainable population is hence more than 500 million *(A: That's world wide.)* but less than one billion."

- Club of Rome, Goals for Mankind

*(A: The wonderful Jacques Cousteau... "We are here on the Calypso to dive in the nice water..." Everybody loved Jacques Cousteau.)*

"One America burdens the earth much more than twenty Bangladeshes. This is a terrible thing to say. In order to stabilize world population, we must eliminate 350,000 people per day. It is a horrible thing to say, but it's just as bad not to say it."

- Jacques Cousteau, UNESCO Courier *(A: UNESCO for the United Nations.)*

"I suspect that eradicating small pox was wrong. It played an important part in balancing ecosystems."

- John Davis, editor of Earth First! Journal

(A: *Ha, ha... oh.*)

~~~~~  
"The extinction of the human species may not only be inevitable but a good thing."

- Christopher Manes, Earth First!

(A: *These are the guys that go and talk at these world meetings.*)

~~~~~  
"The extinction of Homo Sapiens would mean survival for millions, if not billions, of Earth-dwelling species. Phasing out the human race will solve every problem on Earth - social and environmental."

- Ingrid Newkirk, former President of PETA

~~~~~  
"Childbearing should be a punishable crime against society, unless the parents hold a government license. All potential parents should be required to use contraceptive chemicals, the government issuing antidotes to citizens chosen for childbearing."

- David Brower, first Executive Director of the Sierra Club (A: *Big player... the Sierra club, big foundation, grant maker, a lot of front groups.*)

(A: *In other words, they want to sterilize you with chemicals. That's what Mr. Ehrlich said in his book... they could use chemicals to sterilize the public; and for those who are WORTHY to bear a child, they could give the antidote.*)

~~~~~  
"The fate of mankind, as well as of religion, depends upon the emergence of a new faith in the future. Armed with such a faith, we might find it possible to resanctify the earth."

- Al Gore, Earth in the Balance

(A: *What a religion this is.*)

~~~~~  
(A: *The Club of Rome again, the Humanist. Humanists are a religion themselves.*)

"The greatest hope for the Earth lies in religionists and scientists uniting to awaken the world to its near fatal predicament and then leading mankind out of the bewildering maze of international crises into the future Utopia of humanist hope."

- Club of Rome, Goals for Mankind

(A: *Where the better ones, the scientific elite will run your life for you from birth to grave.*)

~~~~~  
"What an incredible planet in the universe this will be when we will be one human family living in justice, peace, love and harmony with our divine Earth (A: *Divine earth again. Here are these religious topics.*), with each other and with the heavens."

- Robert Muller, UN Assistant Secretary General

~~~~~  
"The earth is literally our mother, not only because we depend on her for nurture and shelter but even more because the human species has been shaped by her in the womb of evolution.... Our salvation depends upon our

ability to create a religion of nature."  
- Rene Dubos, board member, Planetary Citizens

*(A: That ties in with Gorbachev who said that even though he was an atheist, he said that WE are creating a new world religion and it will be based on a form of earth worship. Of course, the sciences will be the high priests wearing the white coats for this religion.)*

~~~~~

And I could go on and on and on. This is from a site called The Green Agenda and I'll put the link up at the end of the show and you can see it for yourself. It goes on and on and on. It's very interesting indeed.

I've got an article from Barcelona, Spain. It's to do with the little arguments they had at the Barcelona meeting where they drafted all this stuff up that they're just going to go over and sign in Copenhagen.

**UN climate chief: Deal must be legally enforceable**  
By ARTHUR MAX (AP) (google.com) - Nov. 2, 2009

BARCELONA, Spain — Developing countries don't trust wealthy nations' promises that they will help them meet the challenges of climate change *(A: You know, the weather changes.)*, the U.N.'s top climate official said Monday, adding that means any new global warming deal must have legal force. The legal status of an agreement and whether nations will be sanctioned for failing to meet their commitments *(A: That means fining the countries, you understand, if you don't keep up with your payments, or you can't make them.)* are contentious issues in talks on controlling the world's emissions of carbon and other heat-raising greenhouse gases. *(A: Ho, oh... utter nonsense.)*

"We live in a world of broken promises," said Yvo de Boer, the U.N. climate chief *(A: He's actually the Pope of the powers of the air. He's in charge of the world's atmosphere. He's got a big, big stick and he just waves it just like King Lear and everything will be okay once we all pay this money.)*, told The Associated Press. Developing countries are concerned "they will commit to targets and not deliver."

Really, at this meeting they already developed all the stuff that's to be talked about and signed about and drafted. It's already drafted up for the FORMALITY at Copenhagen. Everything is a show for the public, folks. It really, really is a show. It truly is a show and the public don't know it at all.

Also, if you want to know what the future is in health care for the US, you can look into The Center for Continuing Professional Education at Harvard. I'll put this link up too.

**Forces of Change: New Strategies for the Evolving Health Care Marketplace**

April 20-23, 2010 • Boston, MA

Very, very interesting what they have there. They've got certain workshops. One is called

Capstone Activation Workshop (A: *CAPSTONE, pyramid one.*)

Socratic Dialogues (A: *Socrates dialogue.*)

Cast Studies (A: *Interesting*)

Leadership forum (A: *And all the rest of them and...*)

Luncheon Roundtable Dialogues (A: *...afterwards.*)

Very, expensive to attend, mind you.

Program Fees

\$1,995.00: if payment received by January 22, 2010

\$2,295.00: if payment received after January 22, 2010

It's not for the riff-raff. They don't want us all attending and find out what they're prattling on about as they bring us down into utter poverty, by decreasing health care as they tell you they're going to make it better, because that's the agenda, isn't it? Back with more after this break.

Hi. I am Alan Watt and we're Cutting Through The Matrix. There's time for a call. There's Paul from Australia on the line. Are you there Paul?

**Paul:** Hello. It's crazy. I can't help but think Alan that our politicians are going to do a cut and run. You know, they'll say okay we're basically just going to put you all into a camp and that way they are going to be dictating to everybody.

**Alan:** There's no doubt about it. They've been setting up really, long before 9/11 happened in 2001. They were setting up internal police/army forces, giving them special training for 20-odd years in preparation for what's coming down the pike. It's all coming around now, what they're all here really for. People have NO idea of the utter poverty that they are going to get rapidly pushed into. They're talking about having to give billions and trillions *per annum* to supposedly third world countries. You know it's not going to go there because they want them to die off.

**Paul:** Exactly.

**Alan:** We're going to be taxed into the grave... just for food. Food will be so expensive you can't buy it eventually. I'm not kidding about that. That's how bad they want to make it.

**Paul:** Wasn't it Barack Obama, he made tobacco 3 times or 4 times the actual price?

**Alan:** That's correct. He did. He jacked it up. It used to be quite cheap and he put it up about fourfold.

**Paul:** Just real quick Alan. About these Swine flu vaccinations... what do you think that's mostly about? Do you think that ultimately, at the end of the day, that they want to change human DNA?

**Alan:** They're already doing it. They've been doing it for years in fact. What they

did from the initial polio vaccines on, was to induce viruses which DO bring on cancers down the road. When you follow the cancer graphs they just shoot up massively right up to the present time until literally, everyone's dying of cancers. That was part ... Even Dr. Salk, on an interview - and I have it here - ADMITTED there was more than just that one; there were HUNDREDS of live viruses - they didn't have names for - but they did know that the simian 40 virus caused cancers. THAT WAS ITS ONLY FUNCTION. They've also been tampering into the GMO food and EVERYONE now has problems digesting food. It's also causing incredible obesity because we can't handle these oils and fats that are in these modified plants at all. Our body can't tolerate them so it stores them up and once you pass 30 pounds, you can't get it off.

**Paul:** Yeah. Very true. Very true. What is in these vaccines today? Does anybody actually know? I've heard they actually have like DNA of all kinds of things like money brains even and stuff like that.

**Alan:** Yes they do. They also have a lot of FETAL tissue in them. We're like cannibals now. We don't realize that and it tells you in every vial that is in it. I read a report a couple of weeks ago from the pharma themselves and named off the term that they used for that and it's in the vials. So there's fetal tissue in there as well. There are hundreds of other viruses. They actually say that they haven't named them yet.

**Paul:** I just wonder if many Jewish people are going to be taking the vaccines because you know how they don't believe in... how they don't want to... you know the drainage of blood out of the animal before eating it. Not to have any DNA to put into your own basically.

**Alan:** That is true. The religious ones technically can't take it. They can't take anything with the swine DNA in it. That's forbidden... so it's going to be interesting to see. That's why Israel forbid it, I think, over there. Most won't, I suppose.

**Paul:** Thank you very much.

**Alan:** Thanks for calling.

It's amazing though what's going on and they never tell us the truth, but I've been reading stuff here that should put the wind up of everyone. These guys are mass murderers and they know it. They feel it's their responsibility to cull us all off. Our time is over. We are the old man. We haven't evolved enough.

From Hamish and myself in Ontario, Canada, it's good night and may your God or your Gods GO with you.
